移除操作

目录

- 移除小部件操作
- 移除列操作
- 移除区块操作

要从上下文菜单中移除一个现有的操作，我们需要从某个组中删除该操作。

移除小部件操作

在下面的示例中，我们将从位于 `widget` 上下文菜单中的 `custom-widget-actions` 组中移除 `widget-action` 操作：

```
elementor.hooks.addFilter( 'elements/context-menu/groups', ( customGroups, elementType ) => {

	if ( 'widget' === elementType ) {
		customGroups.forEach( ( group ) => {
			if ( 'custom-widget-actions' === group.name ) {
				const actionIndex = group.actions.findIndex( ( action ) => 'widget-action' === action.name
				if ( actionIndex > -1 ) {
					group.actions.splice( actionIndex, 1 );
				}
			}
		} );
	}

	return customGroups;

} );
```
