移除群组

目录

- 移除小部件群组
- 移除列群组
- 移除区块群组

要从上下文菜单中移除群组，我们需要检查该群组是否存在于相关的菜单类型中，并从上下文菜单中删除该群组。这将删除整个群组以及分配给该群组的所有操作。

移除小部件群组

在下面的示例中，我们将从 `widgets` 上下文菜单中移除 `custom-widget-actions` 群组：

```
elementor.hooks.addFilter( 'elements/context-menu/groups', ( customGroups, elementType ) => {

	if ( 'widget' === elementType ) {
		const groupIndex = customGroups.findIndex( ( group ) => 'custom-widget-actions' === group.nam
);
		if ( groupIndex > -1 ) {
			customGroups.splice( groupIndex, 1 );
		}
	}

	return customGroups;

} );
```

移除列群组

现在我们将从 `columns` 上下文菜单中移除 `custom-column-actions` 群组：

```
elementor.hooks.addFilter( 'elements/context-menu/groups', ( customGroups, elementType ) => {

□if ( 'column' === elementType ) {
□□const groupIndex = customGroups.findIndex( ( group ) => 'custom-column-actions' === group.nam
);
□□if ( groupIndex > -1 ) {
□□□customGroups.splice( groupIndex, 1 );
□□}
□}

□return customGroups;

} );
```

□□□□□

□□□□□□□ `section` □□□□□□□□ `custom-section-actions` □□□

```
elementor.hooks.addFilter( 'elements/context-menu/groups', ( customGroups, elementType ) => {

□if ( 'section' === elementType ) {
□□const groupIndex = customGroups.findIndex( ( group ) => 'custom-section-actions' ===
group.name );
□□if ( groupIndex > -1 ) {
□□□customGroups.splice( groupIndex, 1 );
□□}
□}

□return customGroups;

} );
```
