acf/blocks/default_block_version

- Description
- Changelog
- Example
  - functions.php
- Notes

Description

Used to opt all of your ACF Blocks into a specific version.

Changelog

- Added in version 6.6

Example

functions.php

```
function my_custom_function_to_bump_the_block_version( $version, $block ) {
     return 3; // Use v3
}
add_filter( 'acf/blocks/default_block_version',
'my_custom_function_to_bump_the_block_version', 10, 2 );
```

Notes

If you have defined the ‘blockVersion’ specifically in your `block.json` file, the filter will not override that.
