acf/field_group/admin_enqueue_scripts

- Description
- Changelog
- Example
  - functions.php

Description

Used to enqueue scripts and styles on the field group admin edit page.

This action is similar to the WordPress admin_enqueue_scripts, except that it is only fired on the field group admin edit page.

Changelog

- Added in version 5.0.0

Example

This example demonstrates how to enqueue custom styles and scripts to customize field group settings.

functions.php

```
<?php
add_action('acf/field_group/admin_enqueue_scripts',
```

```
'my_acf_field_group_admin_enqueue_scripts');
function my_acf_field_group_admin_enqueue_scripts() {
    wp_enqueue_style( 'my-acf-field-group-css', get_stylesheet_directory_uri() . '/css/my-acf-field-group.css', false, '1.0.0' );
    wp_enqueue_script( 'my-acf-field-group-js', get_stylesheet_directory_uri() . '/js/my-acf-field-group.js', false, '1.0.0' );
}
```
