

acf/field_group/auto_add_first_field

- [Description](#)
- [Changelog](#)
- [Example](#)
 - [functions.php](#)

Description

Filter for determining if a new field group should load with a text field automatically. The default behavior for this filter is true, meaning field groups will initialize with a text field automatically.

Changelog

- Added in version 6.1.7

Example

This example demonstrates how to disable the auto generation of a text field on a newly created field group.

functions.php

```
<?php
add_filter( 'acf/field_group/auto_add_first_field', '__return_false' );
```
