

mypy

The `mypy` static type checker is used to check the following code against each Python version supported by the control node:

```
“ • lib/ansible/
  • test/lib/ansible_test/_internal/
```

Additionally, the following code is checked against Python versions supported only on managed nodes:

```
“ • lib/ansible/modules/
  • lib/ansible/module_utils/
```

See [the mypy documentation](#)
