Checkbox

□□

- Config methods
  - set_option_value($value)

The checkbox field create a single tick-able option with a label next to it.

```
Field::make( 'checkbox', 'crb_show_content', __( 'Show Content' ) )
    ->set_option_value( 'yes' )
```

Config methods

`set_option_value( $value )`

Set the value that will be saved when the option is ticked.

!> When unticked, an empty value is stored in the database.

```
Field::make( 'checkbox', 'crb_show_content', 'Show content' )
    ->set_option_value( 'yes' )
```

!> Use a boolean value when referencing a checkbox field in `set_conditional_logic()`

```
Field::make( 'checkbox', 'crb_show_content', 'Show content' ),
Field::make( 'rich_text', 'crb_content', 'Content' )
     ->set_conditional_logic( array(
□□□array(
□□□□'field' => 'crb_show_content',
□□□□'value' => true,
□□□)
    ) ),
```
