

File

- [Config methods](#)
 - [set_type\(\\$mime_type \)](#)
 - [set_value_type\(\\$value_type \)](#)

Renders a file upload field with a preview thumbnail of the uploaded file. The built-in WordPress file handling interface is used.

This field type stores the **ID** of the selected file.

```
Field::make( 'file', 'crb_file', __( 'File' ) )
```

Config methods

set_type(\$mime_type)

Set the allowed file type as a `string` or an `array` of types. Short mime types are also supported (`audio`, `video`, `image`).

Any mime in the list of acceptable file extensions for upload to the WordPress Media can be used.

You can read more [here](#).

```
Field::make( 'file', 'crb_file', __( 'File' ) )  
->set_type( array( 'audio', 'image' ) )
```

set_value_type(\$value_type)

Set the type of the stored value. (defaults to `id`)

You can set to `url` to store the URL of the file instead of the ID.

```
Field::make( 'file', 'crb_file', __( 'File' ) )  
->set_value_type( 'url' )
```
