Text

□□

- Config methods
- set_attribute($name, $value = '')

The text field is the simplest and most generic field. It renders a text input field.

```
Field::make( 'text', 'crb_phone_number', __( 'Phone Number' ) )
```

Config methods

`set_attribute( $name, $value = '' )`

Sets a direct attribute of the resulting `<input>` field. Can only be one of the following: `max`, `maxLength`, `min`, `pattern`, `placeholder`, `readOnly`, `step`, `type` and `data-*`.

```
Field::make( 'text', 'crb_phone_number', __( 'Phone Number' ) )
    ->set_attribute( 'placeholder', '(***) ***-****' )
```
