Capability matrix

A human participant joins a meeting with the RealtimeKit SDKs. An agent joins with the Agent WebSocket. The table compares what each can do once it is in the meeting.

:::note Agents can only receive meeting events today. Sending is planned, and those capabilities are marked as planned in the capability table. :::

Capability	Human	Agent
Receive live transcripts	□	□
Receive participant joins and leaves	□	□
Receive broadcasts	□	□
Send broadcasts	□	No (Planned)
Send or receive audio, video, and screen share	□	No (Planned)
Send or receive chat and polls	□	No (Planned)
Use plugins and the meeting key-value store	□	No
Meeting controls, such as stage, removing participants, and recording	□	No

For what the agent receives, refer to Events.
