import { Render, DashButton } from "~/components"

Follow this guide to create a Workers AI application using the Cloudflare dashboard.

Prerequisites

Sign up for a Cloudflare account if you have not already.

Setup

To create a Workers AI application:

1. In the Cloudflare dashboard, go to the **Workers & Pages** page.
2. Select **Create application**.
3. Under **Select a template**, select **LLM Chat App**.
4. Select **Deploy**.
5. Name your Worker, then select **Create and deploy**.
6. Preview your Worker at its provided `workers.dev` subdomain.
