RtkLabel

- Initializer parameters
- Usage Examples
  - Basic Usage
  - With custom appearance

A themed label that uses design token colors and fonts from the RTK Design System.

Initializer parameters

Parameter	Type	Required	Default	Description
`appearance`	`RtkTextAppearance`		-	Text appearance configuration for font and color

Usage Examples

Basic Usage

```
import RealtimeKitUI

let label = RtkLabel()
label.text = "Meeting Room"
view.addSubview(label)
```

With custom appearance

```
import RealtimeKitUI
```

```
let appearance = RtkTextAppearance(
    font: UIFont.systemFont(ofSize: 16, weight: .semibold),
    textColor: .white
)
let label = RtkLabel(appearance: appearance)
label.text = "Meeting Room"
view.addSubview(label)
```
