Type conversion functions

□□

- toUInt8
- toUInt32

import { Badge } from "~/components"

toUInt8

Usage:

```
toUInt8(<expression>)
```

Converts any numeric expression, or expression resulting in a string representation of a decimal, into an unsigned 8 bit integer.

Behaviour for negative numbers is undefined.

toUInt32

Usage:

```
toUInt32(<expression>)
```

Converts any numeric expression, or expression resulting in a string representation of a decimal, into an unsigned 32 bit integer.

Behaviour for negative numbers is undefined.
