Submit button

A submit button is an essential component of a form. As you may know, HTML represents a submit button as an input element with submit type: . You can use this HTML tag in a contact form of Contact Form 7, but you should use Contact Form 7’s own submit form-tag instead. This is the simplest form of submit tag: [submit] You can add a value like this: [submit "Send Mail"] Did you notice that the submit tag’s syntax is bit different than other form-tags? The submit tag does not have name part, which other form tags have. In addition to this, you can add several options to submit tag. OptionExamplesDescriptionid:(id)id:fooid attribute value of the input element.class:(class)class:barclass attribute value of the input element. To set two or more classes, you can use multiple class: option, like [submit class:y2008 class:m01 class:d01]. Example: [submit class:button id:form-submit "Send Mail"] Share this:FacebookTwitterLike this:Like Loading...
