Delete a repository

> Deleting a repository deletes all the images it contains and its build settings. This action can't be undone.

1. Sign in to Docker Hub.
2. Select **My Hub** > **Repositories**.
   A list of your repositories appears.
3. Select a repository.
   The **General** page for the repository appears.
4. Select the **Settings** tab.
5. Select **Delete repository**.
6. Enter the name of your repository to confirm.
7. Select **Delete Repository Forever**.
