Manage subscription seats

- Add seats to your subscription
- Volume pricing
- Remove seats from your subscription

You can add or remove seats from your Docker Team or Business subscription at any time to accommodate team changes. When you add seats mid-billing cycle, you're charged a prorated amount for the additional seats.

> If you have a sales-assisted Docker Business subscription, contact your account manager to add or remove seats from your subscription.

Add seats to your subscription

To add seats:

1. Sign in to Docker Home and select your organization.
2. Select **Billing**.
3. Select the action menu from the **Active Plans** tile, then choose **Add seats**.
4. Follow the on-screen instructions to complete adding seats.
   - You can't use pay by invoice for purchasing additional seats.
   - You must use a card or US bank account.

You can add more members to your organization. For more information, see Manage organization members.

Volume pricing

Docker offers volume pricing for Docker Business subscriptions starting at 25 seats. Contact the Docker Sales Team for more information.

Remove seats from your subscription

You can remove seats from your Team or Business subscription at any time. To remove seats:

1. Sign in to Docker Home and select your organization.
2. Select **Billing**.
3. Select the action menu, then choose **Remove seats**.
4. Follow the on-screen instructions to complete removing seats.

Changes apply to your next billing cycle, and unused portions aren't refundable.

For example, if you're billed on the 8th of every month for 10 seats and remove 2 seats on the 15th, the 2 seats remain available until your next billing cycle. Your payment for 8 seats begins on the next billing cycle.

> You can cancel the removal of seats before your next billing cycle. To do so, select **Cancel change**.
