Built-in Tabs

Elementor has 6 pre-defined tabs used in different panels:

Name/ID	Label	Constant
`content`	Content	`\Elementor\Controls_Manager::TAB_CONTENT`
`style`	Style	`\Elementor\Controls_Manager::TAB_STYLE`
`advanced`	Advanced	`\Elementor\Controls_Manager::TAB_ADVANCED`
`responsive`	Responsive	`\Elementor\Controls_Manager::TAB_RESPONSIVE`
`layout`	Layout	`\Elementor\Controls_Manager::TAB_LAYOUT`
`settings`	Settings	`\Elementor\Controls_Manager::TAB_SETTINGS`

The tabs are set in the `\Elementor\Controls_Manager` class. They are defined as constants and registered using the `init_tabs()` method; each constant contains the tab name and label.

□□□ □□□□

```
.elementor-panel .elementor-tab-control-new-tab a:before,
.elementor-panel .elementor-tab-control-new-tab span:before {
font-family: eicons;
content: '\e942';
}
```
