□□□□□□□□□□□

- □□□□□ `(string)` – □□□□□□□□□
- □□□□□ `(array)` – □□□□□□□□□

□□□□

□□□□□□□□□□□□□□□□□ `Group_Control_Border`
□□□□□□□□□□□□□□□□□□□□□□□□□□□□

```
class Elementor_Test_Widget extends \Elementor\Widget_Base {

□protected function register_controls(): void {

□□$this->start_controls_section(
□□□'style_section',
□□□[
□□□□'label' => esc_html__( 'Style', 'textdomain' ),
□□□□'tab' => \Elementor\Controls_Manager::TAB_STYLE,
□□□]
□□);

□□$this->add_group_control(
□□□\Elementor\Group_Control_Border::get_type(),
□□□[
□□□□'name' => 'border',
□□□□'selector' => '{{WRAPPER}} .wrapper',
□□□]
□□);

□□$this->end_controls_section();

□}

}
```

# Group Control Fields Options

Here's an advanced setup for changing inner controls inside the group control using `fields_options` :

```
class Elementor_Test_Widget extends \Elementor\Widget_Base {

□protected function register_controls() {
```

```
□□$this->start_controls_section(
□□□'style_section',
□□□[
□□□□'label' => esc_html__( 'Style', 'textdomain' ),
□□□□'tab' => \Elementor\Controls_Manager::TAB_STYLE,
□□□]
□□);

□□$this->add_group_control(
□□□\Elementor\Group_Control_Border::get_type(),
□□□[
□□□□'name' => 'box_border',
□□□□'label' => esc_html__( 'Box Border', 'textdomain' ),
□□□□'fields_options' => [
□□□□□'border' => [
□□□□□□'label' => esc_html__( 'Box Border Type', 'textdomain' ),
□□□□□□'default' => 'solid',
□□□□□],
□□□□□'width' => [
□□□□□□'label' => esc_html__( 'Box Border Width', 'textdomain' ),
□□□□□□'default' => [
□□□□□□□'top' => '1',
□□□□□□□'right' => '2',
□□□□□□□'bottom' => '3',
□□□□□□□'left' => '4',
□□□□□□□'isLinked' => false,
□□□□□□],
□□□□□],
□□□□□'color' => [
□□□□□□'label' => esc_html__( 'Box Border Color', 'textdomain' ),
□□□□□□'default' => '#D4D4D4',
□□□□□],
□□□□],
□□□□'selector' => '{{WRAPPER}} .some-box',
□□□]
□□);

□□$this->end_controls_section();

□}
```

```
}
```
