License Activation

□□

- Command
- Arguments
- Usage Examples

Elementor Pro is a premium product that requires a license. To activate the license for a site you need a valid license key. A license can be activated from the admin panel or from the command line using the `license activate` command.

Command

```
wp elementor-pro license activate <license-key>
```

Arguments

`<license-key>`

(Required) The Elementor Pro license key.

Usage Examples

```
wp elementor-pro license activate XXX
```

This command will activate the Elementor Pro license.
