License Deactivation

□□

- Command
- Arguments
- Usage Examples

Some Elementor Pro licenses can activate multiple sites. If no more activations are left on a license, you can deactivate some sites to free up more activations. You can deactivate a site from the admin panel or from the command line using the `license deactivate` command.

Command

```
wp elementor-pro license deactivate
```

Arguments

None.

Usage Examples

```
wp elementor-pro license deactivate
```

This command will deactivate a site's Elementor Pro license.
