

Repository Activity

- [Contributors](#)
 - [Pulse](#)
 - [Code frequency](#)
 - [Recent commits](#)
-

For each repository, the Activity tab displays insights about the recent changes. It helps figure out how lively it is and which contributors are the most active at a given moment in time.

Contributors

screenshot showing the contributors graph

The overall graph shows all commits over time and allows you to select a range of dates to get a more detailed view. The contributors are also displayed with their individual graphs. The contributor with the most commits is shown first.

Pulse

screenshot showing the pulse graph

A high-level view of the most recent commits and pull requests.

Code frequency

screenshot showing the code frequency graph

Shows the ratio of added and deleted lines over time.

Recent commits

screenshot showing the recent commits graph

The total number of commits over time.
