# 1.7.10.5

Git v1.7.10.5 Release Notes ==========================

Fixes since v1.7.10.4 ---------------------

- "git fast-export" did not give a readable error message when the same mark erroneously appeared twice in the --import-marks input.
- "git rebase -p" used to pay attention to rebase.autosquash which was wrong. "git rebase -p -i" should, but "git rebase -p" by itself should not.
