2.10.5

Git v2.10.5 Release Notes ==========

Fixes since v2.10.4 ----------

- "git cvsserver" no longer is invoked by "git daemon" by default, as it is old and largely unmaintained.

- Various Perl scripts did not use safe_pipe_capture() instead of backticks, leaving them susceptible to end-user input. They have been corrected.

Credits go to joernchen <joernchen@phenoelit.de> for finding the unsafe constructs in "git cvsserver", and to Jeff King at GitHub for finding and fixing instances of the same issue in other scripts.
