Team Sync API

- Get External Groups
- Add External Group
- Remove External Group
- Search Team Groups

{{< docs/shared lookup="developers/deprecated-apis.md" source="grafana" version="<GRAFANA_VERSION>" >}}

> Team Sync is only available in Grafana Enterprise. Read more about Grafana Enterprise.

> If you are running Grafana Enterprise, for some endpoints you'll need to have specific permissions. Refer to Role-based access control permissions for more information.

Get External Groups

`GET /api/teams/:teamId/groups`

Required permissions

See note in the introduction for an explanation.

Action	Scope
teams.permissions:read	teams:*

Example Request:

```
GET /api/teams/1/groups HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Bearer <SERVICE_ACCOUNT_TOKEN>
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

[
  {
    "orgId": 1,
    "teamId": 1,
    "groupId": "cn=editors,ou=groups,dc=grafana,dc=org"
  }
]
```

Status Codes:

- **200** - Ok
- **401** - Unauthorized
- **403** - Permission denied

Add External Group

`POST /api/teams/:teamId/groups`

Required permissions

See note in the introduction for an explanation.

Action	Scope
teams.permissions:write	teams:*

Example Request:

```
POST /api/teams/1/groups HTTP/1.1
Accept: application/json
Content-Type: application/json
```

```
Authorization: Bearer YWRtaW46YWRtaW4=

{
  "groupId": "cn=editors,ou=groups,dc=grafana,dc=org"
}
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

{"message":"Group added to Team"}
```

Status Codes:

- **200** - Ok
- **400** - Group is already added to this team
- **401** - Unauthorized
- **403** - Permission denied
- **404** - Team not found

Remove External Group

`DELETE /api/teams/:teamId/groups?groupId=external-group-id`

Required permissions

See note in the introduction for an explanation.

Action	Scope
teams.permissions:write	teams:*

Example Request:

```
DELETE /api/teams/1/groups?groupId=cn%3Deditors%2Cou%3Dgroups%2Cdc%3Dgrafana%2Cdc%3Dorg
HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Bearer <SERVICE_ACCOUNT_TOKEN>
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

{"message":"Team Group removed"}
```

Status Codes:

- **200** - Ok
- **401** - Unauthorized
- **403** - Permission denied
- **404** - Team not found/Group not found

Search Team Groups

`GET /api/teams/:teamId/groups/search`

Search for team groups with pagination support.

Required permissions

Action	Scope
teams.permissions:read	teams:*

Example Request:

```
GET /api/teams/1/groups/search?name=editors&query=group&page=1&perpage=10 HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Bearer <SERVICE_ACCOUNT_TOKEN>
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

[
  {
    "totalCount": 1,
    "teamGroups": [
      {
```

```
        "orgId": 1,
        "teamId": 1,
        "groupId": "cn=editors,ou=groups,dc=grafana,dc=org"
      }
    ],
    "page": 1,
    "perPage": 10
  }
]
```

Status Codes:

- **200** - Ok
- **400** - Bad Request (invalid team ID format or missing query parameter)
- **401** - Unauthorized
- **403** - Permission denied
- **500** - Internal Server Error
