custom-loaders

- Custom icon loaders
  - Usage
  - Example

```
title: "Iconify for React Functions: setCustomIconLoader and setCustomIconsLoader"
types:
  IconifyJSON: "../../types/iconify-json.md"
  IconifyIcon: "../../types/iconify-icon.md"
functions:
  loadIcon: "./load-icon.md"
```

Custom icon loaders

This tutorial is part of Iconify for React tutorial.

`include icon-components/functions/set-loaders/intro`

Usage

`include icon-components/functions/set-loaders/props`

Example

```
src: icon-components/common/set-loader.js
```

Make sure loader is set before any icons are rendered, otherwise component might attempt to load icon from API and fail to render it.
