export-svg

□□

- Export all Iconify icons as SVG

```
title: Export all Iconify icon sets as SVG
```

Export all Iconify icons as SVG

This example shows how to generate SVG files for all icons from `[npm]@iconify/json` package.

First, create a blank Node project, add `[npm]@iconify/tools` as a dependency.

Then create file `[file]export-files.mjs` and put this content:

```
src: libraries/tools/examples/export-all-files.mjs
title: 'export-files.mjs'
```

Then run that file:

```
node export-files.mjs
```
