get-icon-data

- getIconData()
  - Usage
  - Example

```
title: getIconData() in Iconify Utils
types:
  IconifyJSON: '/docs/types/iconify-json.md'
  IconifyIcon: '/docs/types/iconify-icon.md'
functions:
  iconToSVG: './icon-to-svg.md'
```

getIconData()

This function is part of Iconify Utils package.

Function `[func]getIconData()` retrieves data for one icon from icon set.

Usage

Function has the following parameters:

- `[prop]data`, `[type]IconifyJSON`. Icon set data.
- `[prop]name`, `[type]string`. Icon name.

Function returns icon data with type `[type]IconifyIcon`, `null` on error.

Example

```
src: libraries/utils/get-icon.ts
title: 'usage.ts'
demo: libraries/utils/get-icon.html
demoFirst: false
demoTitle: 'Result:'
```
