- ResolvedIconifyIcon type

```
title: ResolvedIconifyIcon Type
types:
  IconifyIcon: '/docs/types/iconify-icon.md'
  FullIconifyIcon: '../utils/full-iconify-icon.md'
  IconSet: './icon-set/index.md'
```

ResolvedIconifyIcon type

`[type]ResolvedIconifyIcon` type is used in Iconify Utils.

It is `[type]IconifyIcon` with added optional properties that exist in both `[type]ExtendedIconifyIcon` and `[type]ExtendedIconifyAlias`. Currently, there is only one extra property:

- `[prop]hidden`, `[type]boolean`. If value is `true`, icon is hidden and should not be displayed in the list of icons. Usually, this property is set for icons that used to exist in an older version of the icon set, but no longer exist.
