  loadIcons: './load-icons.md'
```

Web component function: loadIcon

This tutorial is part of Iconify Icon web component tutorial.

`include icon-components/functions/load-icon/intro`

Usage

`include icon-components/functions/load-icon/props`

IconifyIconName type

`include types/iconify-icon-name`

Examples

Using `[type]Promise` syntax:

```
src: icon-components/common/load-icon.js
replacements:
  - search: '@iconify/react'
    replace: 'iconify-icon'
```

Async/await syntax:

```
src: icon-components/common/load-icon-async.js
replacements:
  - search: '@iconify/react'
    replace: 'iconify-icon'
```

If you want to load multiple icons, see `[func]loadIcons()`.
