Headers: keys() method

- Syntax
  - Parameters
  - Return value
- Examples
- Specifications
- Browser compatibility
- See also

The `Headers.keys()` method returns an iterator allowing you to go through all keys contained in this object. The keys are String objects.

Syntax

```
keys()
```

Parameters

None.

Return value

Returns an iterator.

Examples

```
// Create a test Headers object
const myHeaders = new Headers();
myHeaders.append("Content-Type", "text/xml");
myHeaders.append("Vary", "Accept-Language");

// Display the keys
for (const key of myHeaders.keys()) {
  console.log(key);
}
```

The result is:

```
content-type
vary
```

Specifications

Browser compatibility
