Window: focus() method

- Syntax
  - Parameters
  - Return value
- Examples
- Specifications
- Browser compatibility

{{APIRef("HTML DOM")}}

Makes a request to bring the window to the front. It may fail due to user settings and the window isn't guaranteed to be frontmost before this method returns.

Syntax

```
focus()
```

Parameters

None.

Return value

None ({{jsxref("undefined")}}).

Examples

```
if (clicked) {
  window.focus();
}
```

Specifications

{{Specifications}}

Browser compatibility
