

Checkbox

- [Screenshots](#)
- [Settings](#)
- [Data](#)
- [Template usage](#)

```
import Screenshots from '@site/src/components/Screenshots';
```

The checkbox field creates a single checkbox.

Screenshots

```
<Screenshots name="checkbox" col1=[ [ '/screenshots/checkbox.png', 'The checkbox field interface'], ] />
```

Settings

Besides the [common settings](#), this field has the following specific settings, the keys are for use with code:

Name	Key	Description
Checked by default	<code>std</code>	Whether the checkbox is checked by default?

This is a sample field settings array when creating this field with code:

```
[
  'name' => 'Checkbox',
  'id'   => 'field_id',
  'type' => 'checkbox',
```

```
'std' => 1, // 0 or 1
1,
```

Data

This field saves the "checked" and "unchecked" values in the database as "1" or "0".

Template usage

Conditional check:

```
$value = rwmb_meta( 'my_field_id' );
if ( $value ) {
    echo 'Checked';
} else {
    echo 'Unchecked';
}
```

Displaying "Yes/No":

```
rwmb_the_value( 'my_field_id' );
```

```
