rwmb_enqueue_scripts

□□

- Examples

This action runs after all Meta Box scripts and styles are enqueued to allows developers to enqueue more scripts and styles.

```
do_action( 'rwmb_enqueue_scripts', $meta_box );
```

It takes 1 parameter: the instance of `RW_Meta_Box` class for the current field group.

Examples

This code enqueues a CSS file for a specific field group.

```
add_action( 'rwmb_enqueue_scripts', function( $meta_box ) {
□if ( $meta_box->id === 'event-details' ) {
□□wp_enqueue_style( 'event', get_template_directory_uri() . '/css/admin/event.css' );
□}
} );
```
