Select Advanced

- Screenshots
- Settings

import Screenshots from '@site/src/components/Screenshots'; import ChoiceSingle from '../_parts/_choice-single.md';

The select advanced field creates a beautiful select dropdown using the select2 library.

Settings

Besides the common settings, this field has the following specific settings, the keys are for use with code:

Name	Key	Description
Choices	`options`	List of choices, each per line. If you need to set values and labels, use the format "value: Label" for each choice. When using with code, this setting is an array of `'value' => 'Label'`.
Multiple	`multiple`	Whether to allow select multiple values? `true` or `false` (default).
Placeholder	`placeholder`	The placeholder text.
Display "Toggle All" button	`select_all_none`	Display "Toggle All" button to quickly toggle choices. Applied only when "Multiple" is set.
Select2 options	`js_options`	Options for `select2` library. See here.

By default, Meta Box applies these default options for select2:

Name | Value | Description --- | --- `allowClear` | `true` | Allow users to clear selection. `width` | `resolve` | Set width by element's width. `placeholder` | `$field['placeholder']` | Make `placeholder` works just like `select` field.

This is a sample field settings array when creating this field with code:

```
[
    'name'            => 'Select Advanced',
    'id'              => 'select_advanced',
    'type'            => 'select_advanced',
    'options'         => [
        'java'       => 'Java',
        'javascript' => 'JavaScript',
        'php'        => 'PHP',
        'kotlin'     => 'Kotlin',
        'swift'      => 'Swift',
    ],
    'placeholder'     => 'Select an Item',
    'js_options'      => [
        'containerCssClass' => 'my-custom-class',
    ],
],
```
