Database

This is a disambiguation page: a list of articles associated with the same title. If an internal link referred you to this page, you may wish to change the link to point directly to the intended article.

Please choose one of the following:

- Database activity module - an activity which allows teachers and students to build up a bank of structured information
- External database authentication
- External database enrolment
- Introduction to Moodle's database schema developer documentation

Moodle's database is typically MySQL or Postgres, but can also be Microsoft SQL Server.
