

Nextcloud Office

Nextcloud Office is Nextcloud's built-in office solution, powered by Euro-Office Document Server. It enables real-time collaborative editing of text documents, spreadsheets, and presentations directly in the browser, with high-fidelity rendering that preserves the layout and formatting of your files.

Nextcloud Office supports a wide range of formats including DOCX, XLSX, PPTX, ODT, ODS, ODP and many more.

“ ”

A dedicated Document Server is required for production use. Install the server first, then connect Nextcloud to it using the **Euro-Office** connector app.
