

Call from anywhere

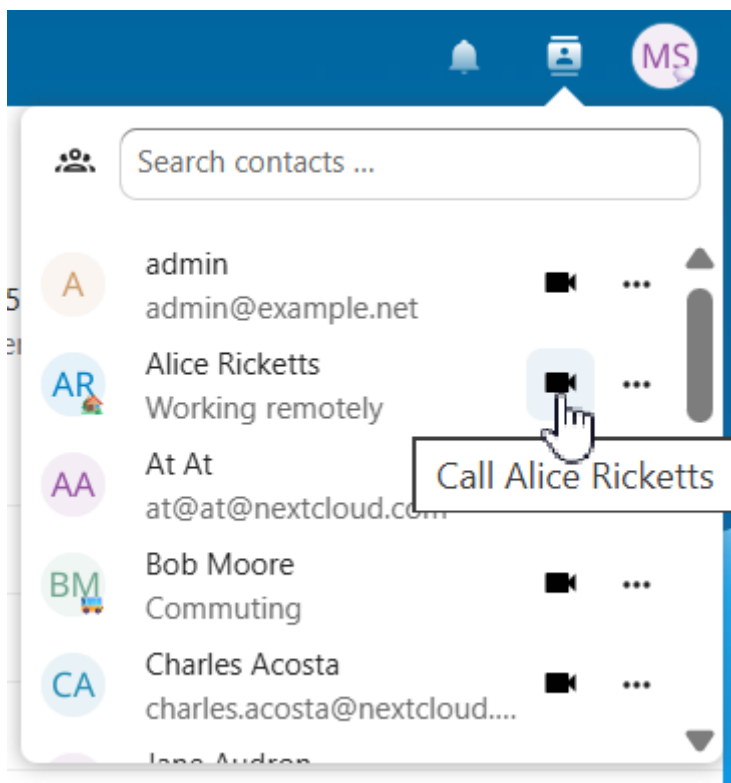

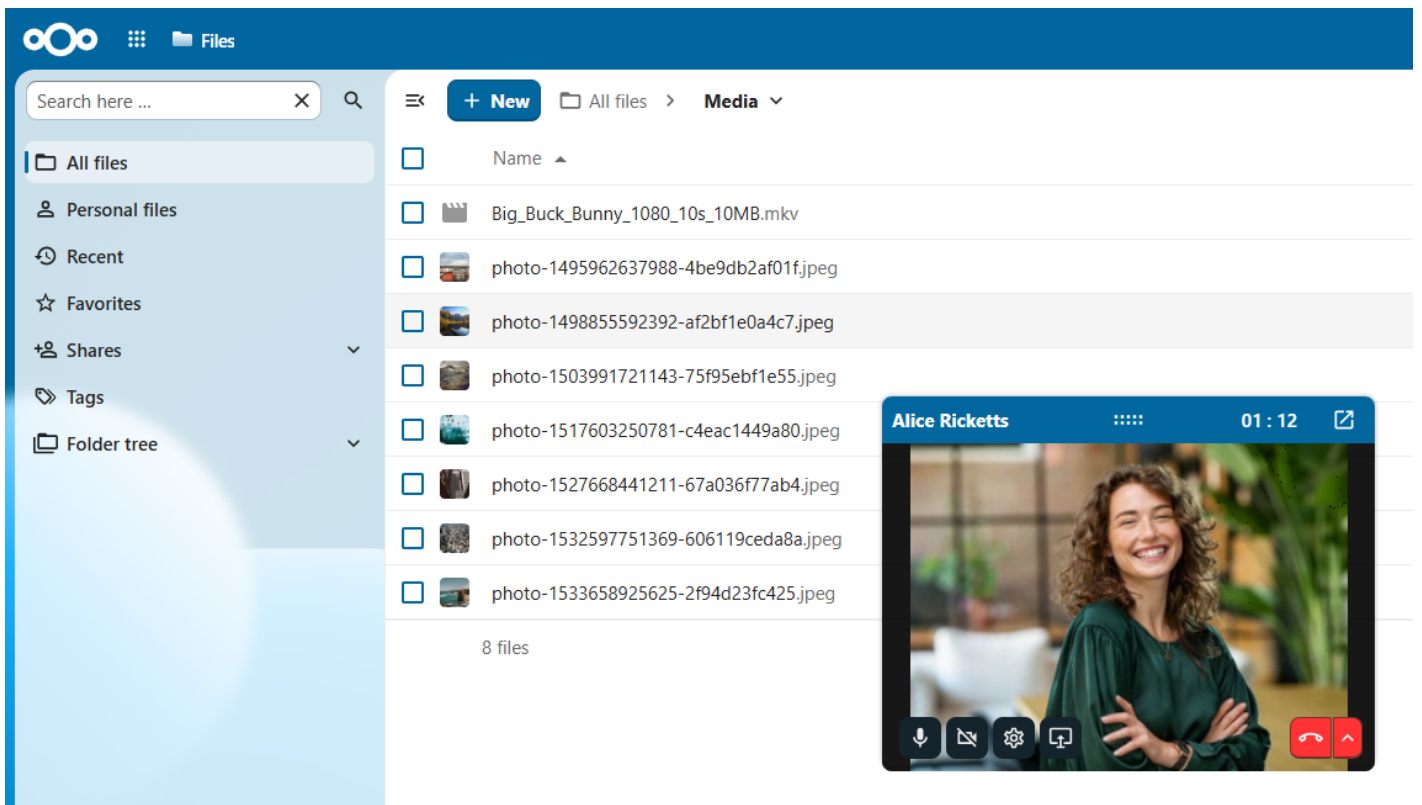

- [Accessing the call menu](#)
- [Best Practices](#)

Start a call with any user directly from the avatar menu. No need to navigate to a conversation first; call while working on files, tasks, or other activities!

Accessing the call menu

1. Click on a user's avatar from any app in your Nextcloud workspace to open a menu
2. Select `Call {user}`
3. A direct call is initiated immediately in a floating window

Best Practices

- **Check availability:** Check user status to see whether people are available before calling
- **Respect preferences:** Some may prefer messages over calls. Could this have been an e-mail?
- **Switch to groups:** Create a dedicated conversation for multi-user discussions
