

Access Markdown files

The pages of your collectives are stored in Markdown files. You can access them via the Files app. Per default, the folder is hidden as it's called `.Collectives` (or a translated version of it). To access the hidden folder, enable "Show hidden files" in the Files app settings.

You can also change the name of the folder in the Collectives app settings. The setting is located in the Collectives app at the bottom of the collectives list. If you want the folder to be visible permanently without showing other hidden files, set the folder setting to a name without leading dot (e.g. `Collectives`). Please note that this is a per-user setting, it only affects the Collectives user folder for the current user.
