

Command-Line Options

You have the option of starting your Nextcloud desktop client with the `nextcloud` command. The following options are supported:

`nextcloud -h` or `nextcloud --help`

Displays all command options.

The other options are:

`--logwindow`

Opens a window displaying log output.

`--logfile <filename>`

Write log output to the file specified. To write to stdout, specify `-` as the filename.

`--logdir <name>`

Writes each synchronization log output in a new file in the specified directory.

`--logexpire <hours>`

Removes logs older than the value specified (in hours). This command is used with `--logdir`.

`--logflush`

Clears (flushes) the log file after each write action.

`--logdebug`

Also output debug-level messages in the log (equivalent to setting the env var `QT_LOGGING_RULES="qt.*=true;*.debug=true"`).

`--confdir <dirname>`

Uses the specified configuration directory.

`--background`

Launch the application in the background (i.e. without opening the main dialog).
