 - [Device-specific passwords and password changes](#)
-

The personal settings page gives you an overview of the connected browsers and devices.

Managing connected browsers

The list of connected browsers shows which browsers have connected to your account recently:

The screenshot shows the 'Personal - Nextcloud' settings interface. The left sidebar contains links to 'Personal info', 'Sessions', 'Devices', 'Sync clients', 'TOTP Second-factor Auth', and 'Federated Cloud'. The main content area is divided into two sections: 'Sessions' and 'Devices'.

Sessions

These are the web, desktop and mobile clients currently logged in to your ownCloud.

Browser	Most recent activity	
Mozilla/5.0 (X11; Linux x86_64; rv:46.0) Gec...	a day ago	
Mozilla/5.0 (X11; Linux x86_64; rv:46.0) Gec...	3 minutes ago	
Mozilla/5.0 (X11; Linux x86_64) AppleWebKit...	seconds ago	
Mozilla/5.0 (X11; Linux x86_64) AppleWebKit...	17 minutes ago	

Devices

You've linked these devices.

Name	Most recent activity	
Android	10 days ago	

You can use the trash icon to disconnect any of the browsers in the list.

Managing devices

The list of connected devices shows all the devices and clients you generated a device password for and their last activity:

The screenshot shows the 'Personal - Nextcloud' interface. The left sidebar contains links to 'Personal info', 'Sessions', 'Devices', 'Sync clients', 'TOTP Second-factor Auth', and 'Federated Cloud'. The main content area is titled 'Devices' and shows a list of linked devices. Below the list is a section for creating a new device password, followed by a 'Language' dropdown set to 'English' and a 'Help translate' link. At the bottom, there is a link to 'Get the apps to sync your files'.

Name	Most recent activity	
Android	10 days ago	
unknown client	3 days ago

A device password is a passcode that gives an app or device permissions to access your ownCloud account.

[Get the apps to sync your files](#)

You can use the trash icon to disconnect any of the devices in the list.

At the bottom of the list, you can create a new device-specific password. You can choose a name to identify the token later. The generated password is used for configuring the new client. Ideally, generate individual tokens for every device you connect to your account, so you can disconnect those individually if necessary:

“ ”

You only have access to the device password when creating it. Nextcloud does not save the plain password, so enter the password on the new client immediately.

“ ”

If you use [Using two-factor authentication](#) for your account, device-specific passwords are the only way to configure clients. The server will then deny connections from clients using your login password.

Device-specific passwords and password changes

When a password changes in an external user backend, all device-specific passwords are marked as invalid. Once you log in with the main password, all device-specific passwords are updated and work again.
