Pool

- Install
- Usage with Ollama
  - Quick setup
  - Run directly with a model
  - Pass arguments through to Pool
- Manual setup

Pool is Poolside's software agent for the terminal, built for enterprise development workflows.

Install

Install Pool:

Usage with Ollama

Quick setup

```
ollama launch pool
```

Run directly with a model

```
ollama launch pool --model kimi-k2.6:cloud
```

Pass arguments through to Pool

Arguments after `--` are passed directly to Pool:

```
ollama launch pool -- --help
```

Manual setup

Pool connects to Ollama using the OpenAI-compatible API via environment variables.

1. Set the environment variables:

```
export POOLSIDE_STANDALONE_BASE_URL=http://localhost:11434/v1
export POOLSIDE_API_KEY=ollama
```

2. Run Pool with an Ollama model:

```
pool -m kimi-k2.6:cloud
```

Or run with environment variables inline:

```
POOLSIDE_STANDALONE_BASE_URL=http://localhost:11434/v1 POOLSIDE_API_KEY=ollama pool -m kimi-k2.6:cloud
```
