cases

UnitEnum::cases

Generates a list of cases on an enum

ENTITY

public

static

array

UnitEnum::cases

This method will return a packed array of all cases in an enumeration, in order of declaration.

ENTITY ENTITY

ENTITY

An array of all defined cases of this enumeration, in order of declaration.

ENTITY

Basic usage

The following example illustrates how enum cases are returned.

```
<?php
enum Suit
{
    case Hearts;
    case Diamonds;
```

```
    case Clubs;
    case Spades;
}

var_dump(Suit::cases());
```

ENTITY

```
array(4) {
  [0]=>
  enum(Suit::Hearts)
  [1]=>
  enum(Suit::Diamonds)
  [2]=>
  enum(Suit::Clubs)
  [3]=>
  enum(Suit::Spades)
}
```
