curl-multi-remove-handle

curl_multi_remove_handle

Remove a handle from a set of cURL handles

ENTITY

int

curl_multi_remove_handle

CurlMultiHandle

multi_handle

CurlHandle

handle

Removes a given `handle` from the given `multi_handle`. When the `handle` has been removed, it is again perfectly legal to run `curl_exec` on this handle. Removing the `handle` while being used, will effectively halt the transfer in progress involving that handle.

ENTITY

ENTITY

Returns 0 on success, or one of the `CURLM_*` error codes.

ENTITY

ENTITY	ENTITY

ENTITY

`curl_init`, `curl_multi_init`, `curl_multi_add_handle`
