# session-save-path

session_save_path

Get and/or set the current session save path

ENTITY

string

false

session_save_path

string

null

path

ENTITY

`session_save_path` returns the path of the current directory used to save session data.

ENTITY

`path`
Session data path. If specified and not ENTITY, the path to which data is saved will be changed. `session_save_path` needs to be called before `session_start` for that purpose.

> On some operating systems, you may want to specify a path on a filesystem that handles lots of small files efficiently.

ENTITY

Returns the path of the current directory used for data storage, ENTITY.

ENTITY

| ENTITY | ENTITY |
| --- | --- |
| 8.0.0 | `path` is nullable now. |

ENTITY

The session.save_path configuration directive
