ALTER LARGE OBJECT

ALTER LARGE OBJECT

7

SQL - Language Statements

ALTER LARGE OBJECT

change the definition of a large object

ALTER LARGE OBJECT

large_object_oid

OWNER TO {

new_owner

| CURRENT_ROLE | CURRENT_USER | SESSION_USER }

Description

`ALTER LARGE OBJECT` changes the definition of a large object.

You must own the large object to use `ALTER LARGE OBJECT`. To alter the owner, you must also be able to `SET ROLE` to the new owning role. (However, a superuser can alter any large object anyway.) Currently, the only functionality is to assign a new owner, so both restrictions always

apply.

Parameters

<large_object_oid>
OID of the large object to be altered

<new_owner>
The new owner of the large object

Compatibility

There is no `ALTER LARGE OBJECT` statement in the SQL standard.
