DROP STATISTICS

DROP STATISTICS

7

SQL - Language Statements

DROP STATISTICS

remove extended statistics

DROP STATISTICS [IF EXISTS]

name

[, ...] [CASCADE | RESTRICT]

Description

`DROP STATISTICS` removes statistics object(s) from the database. Only the statistics object's owner, the schema owner, or a superuser can drop a statistics object.

Parameters

`IF EXISTS`
Do not throw an error if the statistics object does not exist. A notice is issued in this case.

<name>
The name (optionally schema-qualified) of the statistics object to drop.

`CASCADE`; `RESTRICT`
These key words do not have any effect, since there are no dependencies on statistics.

Examples

To destroy two statistics objects in different schemas, without failing if they don't exist:

```
DROP STATISTICS IF EXISTS
    accounting.users_uid_creation,
    public.grants_user_role;
```

Compatibility

There is no `DROP STATISTICS` command in the SQL standard.
