DROP TEXT SEARCH TEMPLATE

DROP TEXT SEARCH TEMPLATE

7

SQL - Language Statements

DROP TEXT SEARCH TEMPLATE

remove a text search template

DROP TEXT SEARCH TEMPLATE [IF EXISTS]

name

[CASCADE | RESTRICT]

Description

`DROP TEXT SEARCH TEMPLATE` drops an existing text search template. You must be a superuser to use this command.

Parameters

`IF EXISTS`
Do not throw an error if the text search template does not exist. A notice is issued in this case.

<name>
The name (optionally schema-qualified) of an existing text search template.

`CASCADE`
Automatically drop objects that depend on the text search template, and in turn all objects that depend on those objects (see ???).

`RESTRICT`
Refuse to drop the text search template if any objects depend on it. This is the default.

Examples

Remove the text search template `thesaurus`:

```
DROP TEXT SEARCH TEMPLATE thesaurus;
```

This command will not succeed if there are any existing text search dictionaries that use the template. Add `CASCADE` to drop such dictionaries along with the template.

Compatibility

There is no `DROP TEXT SEARCH TEMPLATE` statement in the SQL standard.
