`!cgi` --- Common Gateway Interface support

cgi

3.11 3.13

This module is no longer part of the Python standard library. It was `removed in Python 3.13 <whatsnew313-pep594>` after being deprecated in Python 3.11. The removal was decided in `594`.

A fork of the module on PyPI can be used instead: `legacy-cgi`. This is a copy of the cgi module, no longer maintained or supported by the core Python team.

The last version of Python that provided the `!cgi` module was Python 3.12.
