-

acf_get_taxonomies()

Returns an array of taxonomy names.

- @date 7/10/13
- @since ACF 5.0.0
- @param array \$args An array of args used in the get_taxonomies() function.
- @return array An array of taxonomy names.

acf_get_taxonomies_for_post_type()

acf_get_taxonomies_for_post_type

- Returns an array of taxonomies for a given post type(s)
- @date 7/9/18
- @since ACF 5.7.5
- @param string|array \$post_types The post types to compare against.
- @return array

acf_get_taxonomy_labels()

Returns an array of taxonomies in the format "name => label" for use in a select field.

- @date 3/8/18
- @since ACF 5.7.2
- @param array \$taxonomies Optional. An array of specific taxonomies to return.
- @return array

acf_get_term_title()

acf_get_term_title

- Returns the title for this term object.
- @date 10/9/18
- @since ACF 5.0.0
- @param object \$term The WP_Term object.
- @return string

acf_get_grouped_terms()

acf_get_grouped_terms

- Returns an array of terms for the given query \$args and groups by taxonomy name.
- @date 2/8/18
- @since ACF 5.7.2
- @param array \$args An array of args used in the get_terms() function.
- @return array

_acf_terms_clauses()

_acf_terms_clauses

- Used in the 'terms_clauses' filter to order terms by taxonomy name.
- @date 2/8/18
- @since ACF 5.7.2
- @param array \$pieces Terms query SQL clauses.
- @param array \$taxonomies An array of taxonomies.
- @param array \$args An array of terms query arguments.
- @return array \$pieces

acf_get_pretty_taxonomies()

acf_get_pretty_taxonomies

- Deprecated in favor of acf_get_taxonomy_labels() function.
- @date 7/10/13
- @since ACF 5.0.0
- @deprecated 5.7.2

acf_get_term()

acf_get_term

- Similar to get_term() but with some extra functionality.
- @date 19/8/18
- @since ACF 5.7.3
- @param mixed \$term_id The term ID or a string of "taxonomy:slug".
- @param string \$taxonomy The taxonomyname.
- @return WP_Term

acf_encode_term()

acf_encode_term

- Returns a "taxonomy:slug" string for a given WP_Term.
- @date 27/8/18
- @since ACF 5.7.4
- @param WP_Term \$term The term object.
- @return string

acf_decode_term()

acf_decode_term

- Decodes a "taxonomy:slug" string into an array of taxonomy and slug.
- @date 27/8/18
- @since ACF 5.7.4
- @param WP_Term \$term The term object.
- @return string

acf_get_encoded_terms()

acf_get_encoded_terms

- Returns an array of WP_Term objects from an array of encoded strings
- @date 9/9/18
- @since ACF 5.7.5
- @param array \$values The array of encoded strings.
- @return array

acf_get_choices_from_terms()

acf_get_choices_from_terms

- Returns an array of choices from the terms provided.
- @date 8/9/18
- @since ACF 5.7.5
- @param array \$values and array of WP_Term objects or encoded strings.
- @param string \$format The value format (term_id, slug).
- @return array

acf_get_choices_from_grouped_terms()

acf_get_choices_from_grouped_terms

- Returns an array of choices from the grouped terms provided.
- @date 8/9/18
- @since ACF 5.7.5
- @param array \$value A grouped array of WP_Term objects.
- @param string \$format The value format (term_id, slug).

- @return array

acf_get_choice_from_term()

acf_get_choice_from_term

- Returns an array containing the id and text for this item.
- @date 10/9/18
- @since ACF 5.7.6
- @param object \$item The item object such as WP_Post or WP_Term.
- @param string \$format The value format (term_id, slug)
- @return array

acf_get_term_post_id()

Returns a valid post_id string for a given term and taxonomy. No longer needed since WP introduced the termmeta table in WP 4.4.

- @date 6/2/17
- @since ACF 5.5.6
- @deprecated 5.9.2
- @param \$taxonomy (string) The taxonomy type.
- @param \$term_id (int) The term ID.
- @return (string)
