Using the Range Field

- Basic Setup
- Common Use Cases
- Tips

Basic Setup

1. Create a new Field Group
2. Add a Range field
3. Configure options:
   - Set min/max values
   - Configure step size
   - Add prepend/append text
   - Set default value

Common Use Cases

1. Numeric Ranges
   - Volume controls
   - Percentage settings
   - Scale selections
2. Visual Settings
   - Opacity levels
   - Size adjustments
   - Intensity controls

Tips

- Set intuitive ranges
- Use clear min/max values
- Consider step granularity

- Add helpful labels
